

Verification Opinion

Verified as Satisfactory	
Based on the process and procedures conducted, the GHG statement in the GHG Report 'V9 – 24-03-2026 - GHG Inventory Report – Engineering 2024-2025 produced by A.E.S Engineering Ltd:	<ul style="list-style-type: none">• Is materially correct and is a fair representation of GHG data and information.
	<ul style="list-style-type: none">• Has been prepared in accordance with ISO14064-1:2018 and its principles.
	<ul style="list-style-type: none">• <i><Add any additional verification objectives as identified on the verification engagement></i> (delete row as appropriate)
The following improvements were raised in relation to future reporting:	The current methodology for calculating waste emissions uses estimated waste volumes based on receptacle size as the data source. The organisation may wish to consider using data available on waste transfer notes where possible to increase accuracy. This is non-material to overall emissions.
